

MGT 7316 C: Web App Programming and Development

Agenda

June 17, 2023

Introduction

Application Development

Key Terms

Patterns

MVC

Serverless

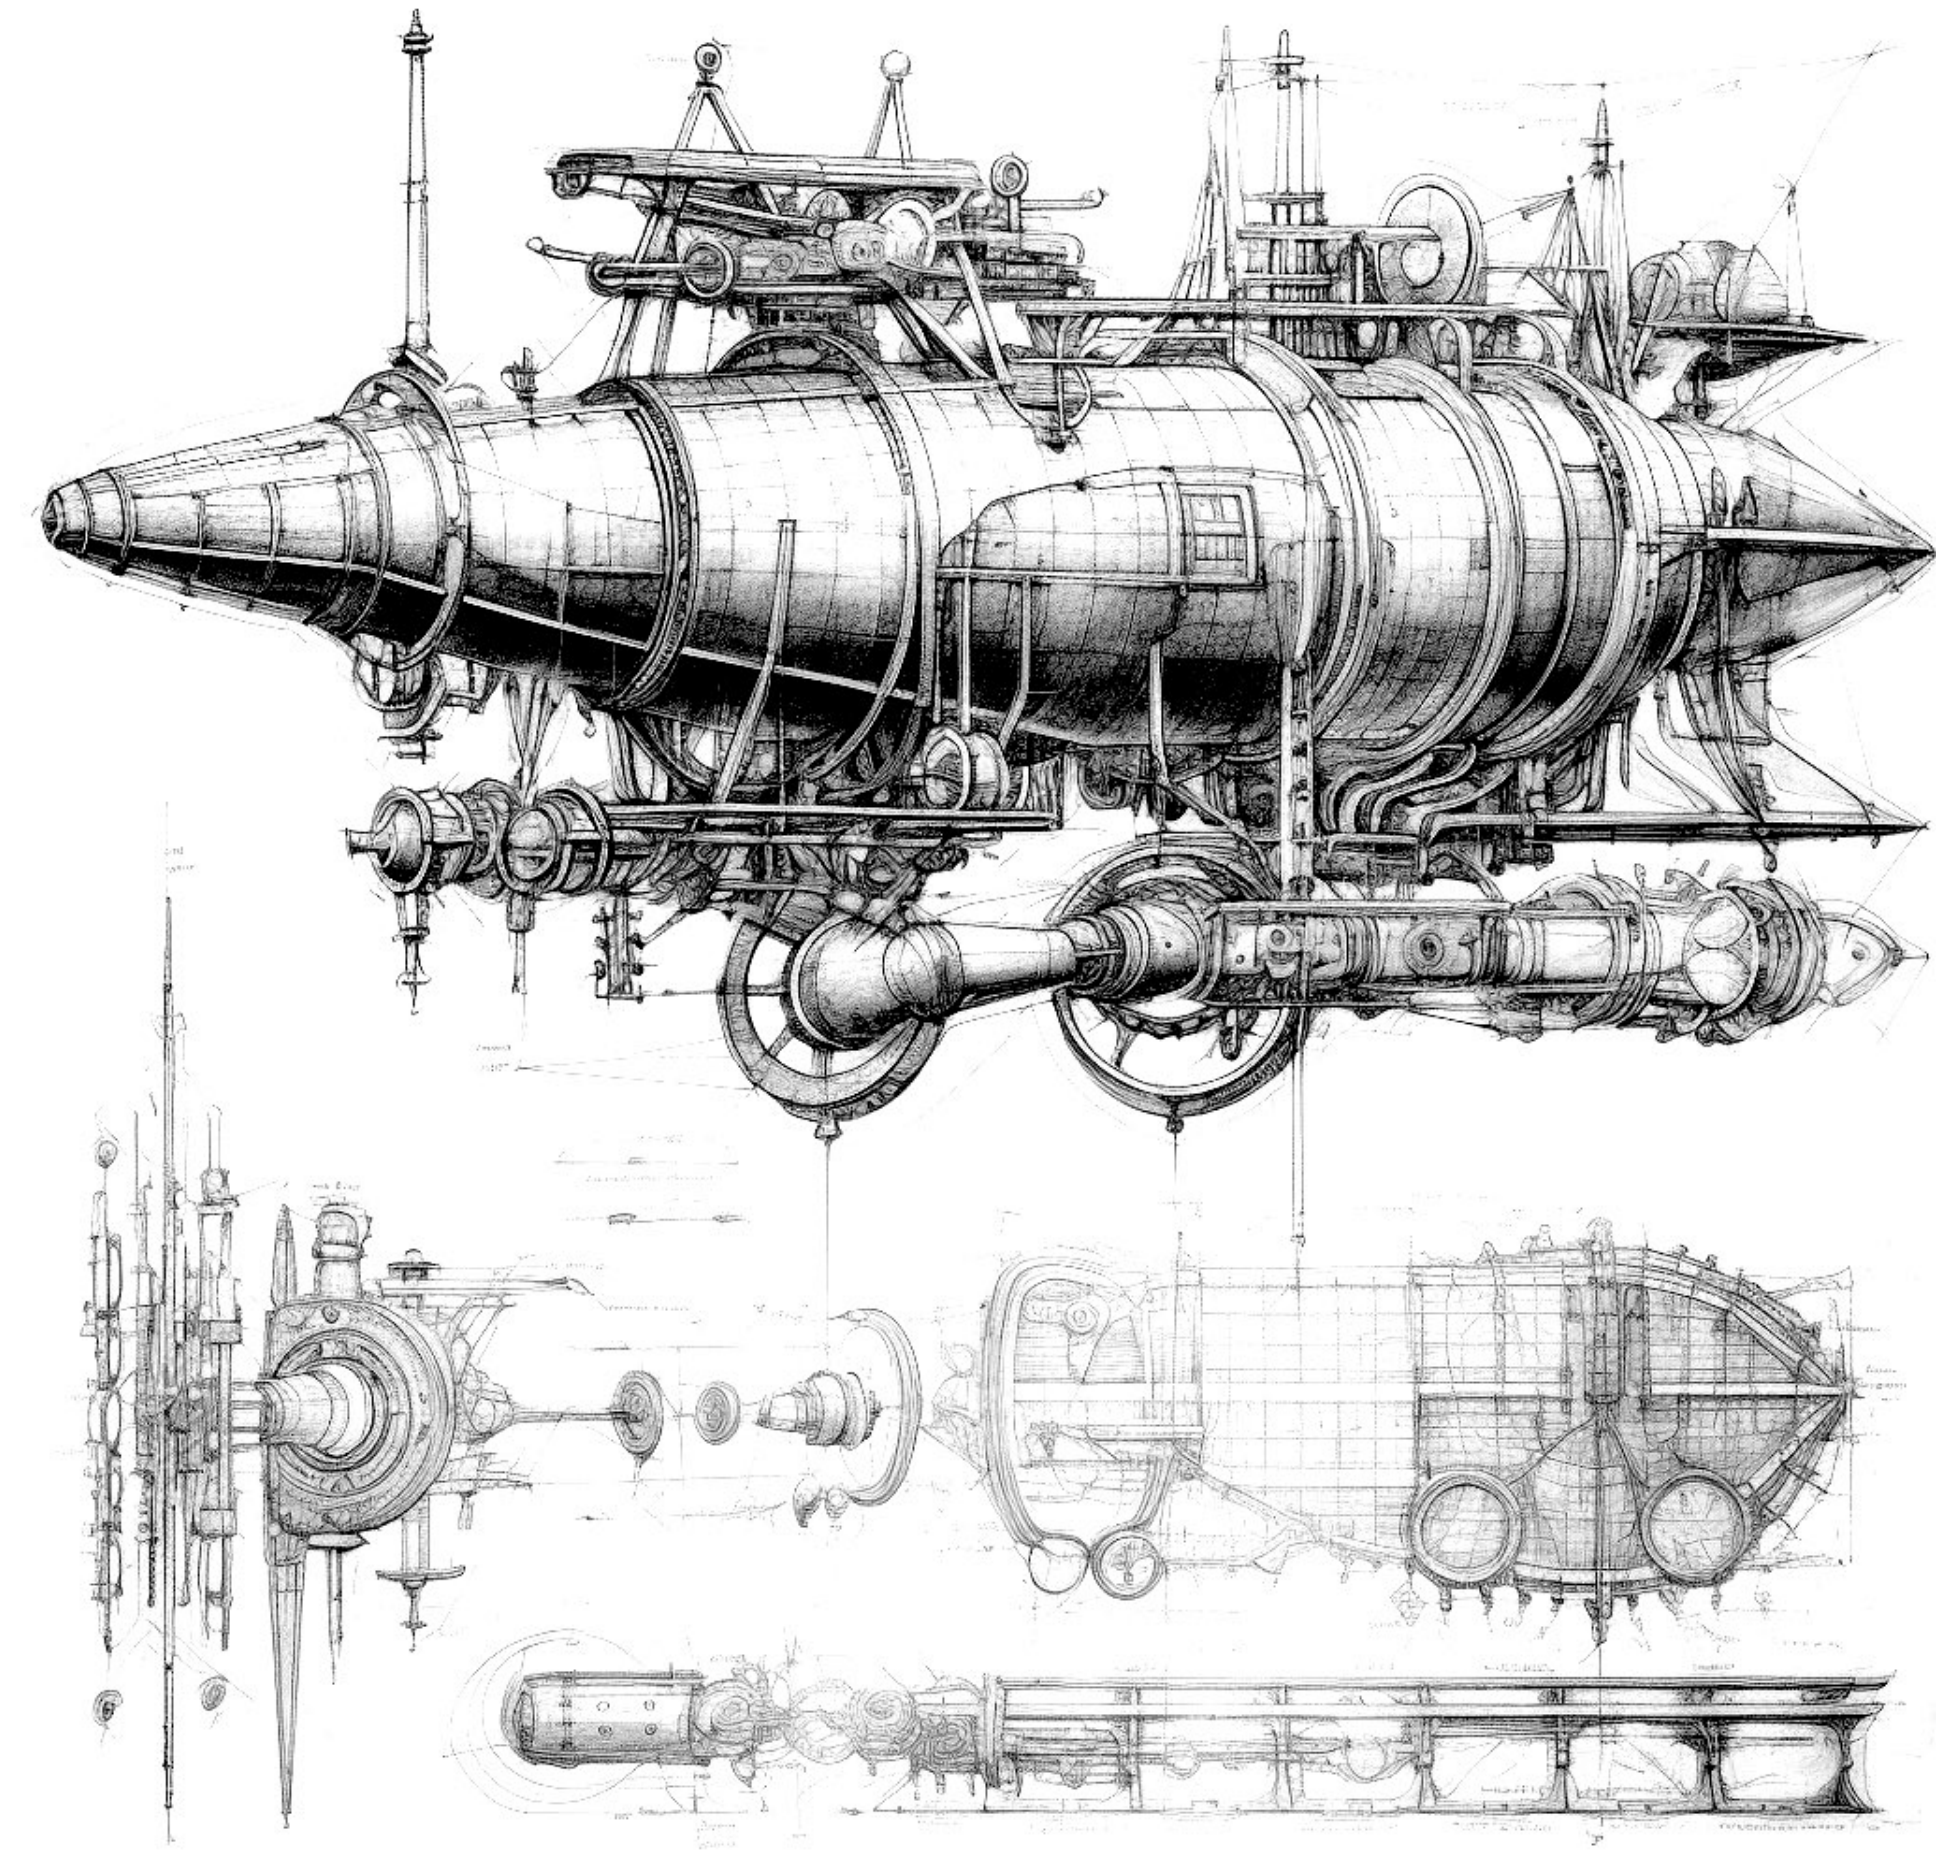

Storage

Source Code Management

Version Control

Code Naming and Organization Best Practices

Module 3 Tasks

Key Terms

Problem Solving Methodology

1. Create a **problem statement**
2. Use computational thinking as the process which **produces an algorithm/pseudocode** (plain language description of steps) which generates the desired condition or result
3. Convert algorithms/pseudocode (**aka encode**)
